

# INNOVATIVE USES FOR THE LATEST EQUIPMENT

Since our company's founding in 1939, the towing industry has changed dramatically. Today we are able to serve our customers with flexible, multiple-use equipment such as the 50-ton rotator at the right. By combining our expertise with the power of our diverse fleet, we can handle equipment whether it's in operating condition or not.

Whether you need to set equipment, recover damaged or inoperable vehicles, or move virtually anything, our rotator either alone or combined with other equipment can handle it efficiently and at a reasonable cost.

## SPECIALIST IN HEAVY EQUIPMENT TRANSPORT

Keep Joe Ballor Towing in mind for virtually any type of equipment move. Whether your load is 500 pounds or 160,000 pounds, we can handle it for you!

In addition to our tilt trailers and flat trailers for structural steel transport, we also offer beam trailers and double drop stretch trailers for tall oversized loads.
